Superintendent
Dr. Joyce Bales

DATE: April 28, 2009

TO: TO ALL PARENTS

SUBJECT: SWINE FLU

The District is working with the San Diego Chapter of the Center for Disease Control to provide parents information about the swine flu. All San Diego Districts working with the San Diego County Office of Education have provided a letter from the Center for Disease Control (CDC) along with fact sheets explaining the symptoms of the disease. Links are provided on the information sheet showing children how to properly wash their hands and other preventative measures.

There are no reported cases of the swine flu in the Vista Unified School District. District staff is taking precautionary measures to protect students and staff members. Custodians at each site are cleaning desk tops, door knobs, and light switches with a high grade disinfectant as protection measures. In addition, the District is making sure soap is available in bathrooms and classrooms to aid in students washing their hands.

Any further updates will be provided via the District's web page under announcements. If you have any questions or concerns, please contact your school site for any additional information.
